

Cobweb Houseleek

Sempervivum arachnoideum L.

- I'm less spooky than I look! I am a low-growing plant with fine, cobweb-like hairs at the tips of my leaves.
- I will grow pink flowers once a year.
- During the winter months, I don't need much water at all. During the summer, I need more regular watering (just make sure my soil is dry in between waterings).
